Manufacturer

Bags

for flexible packaging

guaranteeing the

highest level of

resistance and

safety for each and

every type of

material to be

transported.

FOOD

PLASTIC

MINING

FERTILIZERS

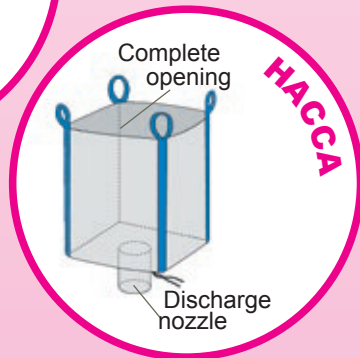

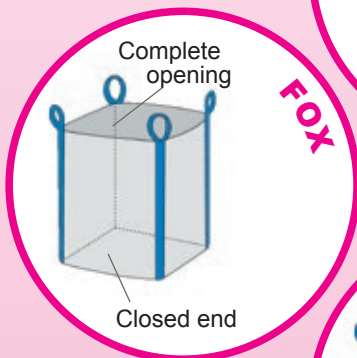

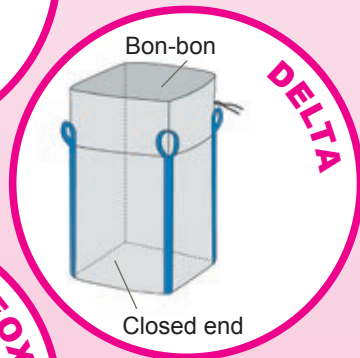

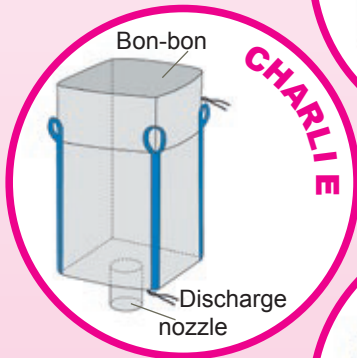

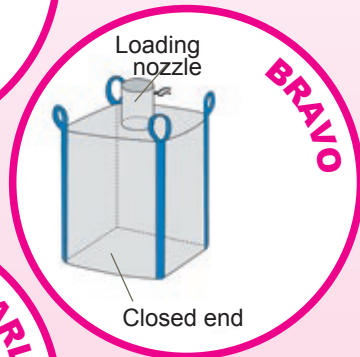

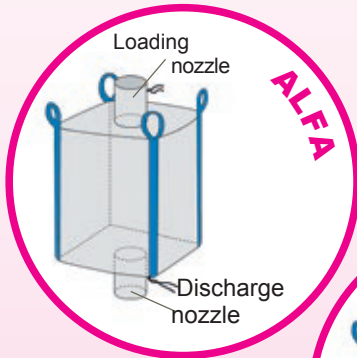

STANDARD TYPES

Made with rectilinear, UV-treated fabric consisting of a U-shaped body with 2 sewn side panels, thus the name U + 2.

Four lifting straps are then applied, along with any anti-dust seams.

Sizes and shapes are as per client requests, and the type of fabric can be laminated or normal.

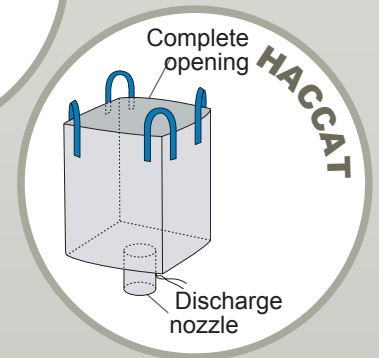

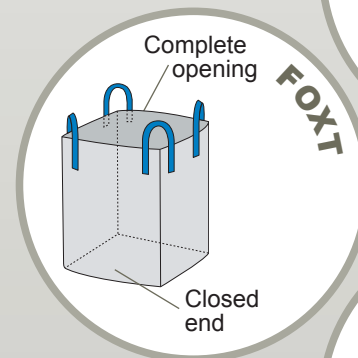

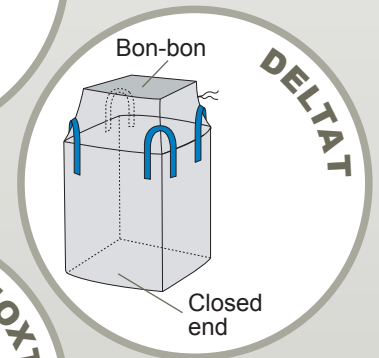

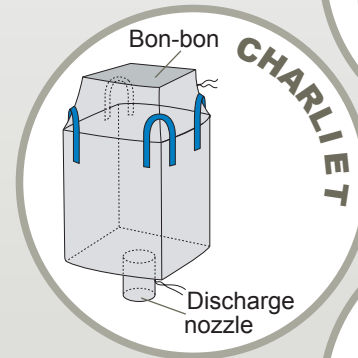

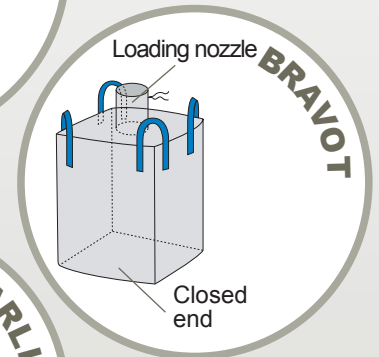

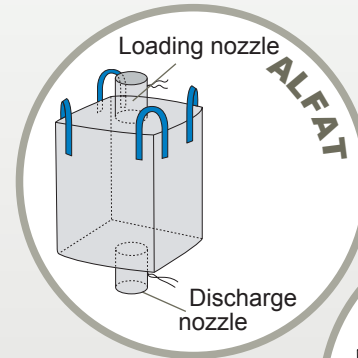

They have a capacity ranging from 500 to 2,000 kg, with the possibility of printing up to 3 colours on 4 sides 3.

TUBULAR TYPES

Made with circular fabric and therefore without side seams, the lifting straps are applied at an angle on 4 points on the upper part of the big bag. The dynamometric characteristics are the same as for the accessories.

Printing can be carried out with a maximum of 3 colours on 2 sides.

Each big bag has four special lines:

SUPREME SPECIAL APPROVED,

ANTI-BULGING, CONDUCTIVE AND SINGLE LIFTING POINT

APPROVED BIG BAGS
